

# Turnkey Services

HMT provides Turnkey Tank Maintenance Services to include any or all of the various tank maintenance services provided by HMT, including maintenance planning, cleaning, inspection, repair, product installation, civil and mechanical work, testing, painting and coating, and commissioning. HMT assists tank owners in their maintenance management programs, providing a "customized" service designed to meet specific facility needs and requirements.

HMT experienced personnel oversee each phase of turnkey projects; from the approval of initial design, through planning, scheduling, cleaning, inspection, procurement, fabrication, delivery, construction, testing, coating, calibration to project completion. The result is a turnkey project with exceptional safety performance, unequalled quality workmanship, and a full range of engineering services which will always distinguish HMT as your contractor of choice.

HMT can provide the combined service of blinding, tank cleaning, inspection, design, repair, testing, coating, cathodic protection, insulation, civil and mechanical work and commissioning. In response to many customer requests, HMT has successfully teamed up with other key suppliers to provide complete turnkey services with just one phone call or purchase order. This provides quicker tank turn-around, reduces internal project management, coordinates costs and reduces additional mobilization costs. Additionally, all key suppliers are evaluated thoroughly to insure all client qualification requirements are met and are in place.

Contact your local HMT representative to discuss the full suite of products and services that will satisfy all your AST needs.

## HMT's Turnkey Services Include:

- Inventory Reduction / Capacity Gain Programs

## HMT's Turnkey Government Services:

Contracting to provide products and services to governmental agencies requires a high level of understanding and expertise. HMT's Government Services group has been organized to effectively manage the provision of all the company's current products and services to federal, state and local agencies while maintaining the proper documentation often associated with governmental agency contracts. This understanding of government contracting allows HMT to provide these services with a level of quality that is unmatched in our industry. This group manages projects on a global basis providing products and services for numerous federal, state and local agencies.

## Typical Government Services Products and Services Include:
